Addressing the growing need for security of BPO employees, Bangalore-based Proficio Geo Technologies has come up with PRO-TMS, a solution that integrates various technologies to cater to this need. The GIS (Geographical Information Solution)-GPS (Global Positioning System)-SMS solution is based on "improved information visibility", company's Vice-President Corporate Development Shashidhar Joshi, told reporters while announcing the launch of the solution here today. The PRO-TMS tracks and monitors vehicle movement using GIS and GPS technologies. With its system automated SMSs reaching the pickup individual confidentially and the back up system in place, security of the woman employee is well-covered, he said. The PRO-TMS, the company claimed, also shrinks 18 man hours of logistics planning to a mere 75 minutes leaving the company personnel with more time to devote towards better relationship building with outsourced agents and quick addressal of employee/driver grievances. The solution enables the facility manager to generate a trip report which is provided to the drivers who will be executing the trip in terms of employee ID and address basis, the company said. The system automated SMS is then sent to each pickup employee providing information on the
